

Cerisier tardif

Cerisier d'automne; Cerisier noir

Black Cherry

Leaves:

Lance-shaped, 5 to 12 cm long
 Summer : Shiny bright green
 Autumn : Yellow to red

Bark

Flowers :

Clusters : 10 to 15 cm
 Color : white
 Season : Spring
 Odor : Slightly fragrant

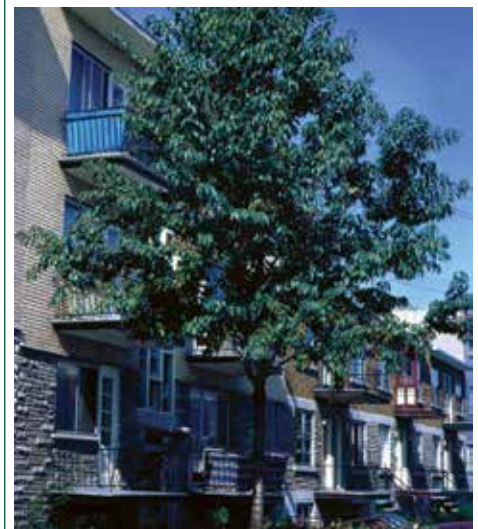

Fruits :

8 mm
 Astringent but edible
 Color : Dark reddish black
 Season : autumn

Safe Planting Distance :

10 m

Shape : Large tree

Hardiness Zone : 2a

Growth Rate : Medium

Light Requirements : Full sun

Height : 20 m

Spread : 10 m

Soil

Soil Humidity : Average

Soil Texture : Loamy

pH : Neutral

Tolerance to Compaction : Low

Tolerance to De-icing Salt : Good

Soil Type : Wide variety of soils

Root System : Root system shallow, wide-spreading

Diseases : Low sensibility, Black Knot

Insects : No important trouble

Quercus rubra

Chêne rouge

Red Oak

Safe Planting Distance :

14,5 m

Shape : Large tree

Hardiness Zone : 3a

Growth Rate : Medium to fast

Light Requirements : Full sun

Height : 24 m

Spread : 24 m

Soil

Soil Humidity : Average

Soil Texture : Loamy, sandy

pH : Slightly acidic, neutral

Tolerance to Compaction : Good

Tolerance to De-icing Salt : Good

Soil Type : Well-drained soils,

Root System : Deep

Diseases : No important trouble

Insects : No important trouble

Leaves :

10-20 cm long, 7-9 lobes

Summer : Green

Autumn : Red

Flowers :

Season : Spring

Fruits :

Acorns, 12-25 mm long

Color : Brown

Season : Autumn

Acer saccharum

Érable à sucre

Érable franc

Sugar Maple

Safe planting distance :

13,5 m

Shape : Large tree

Hardiness Zone : 4a

Growth Rate : Slow

Light Requirements : Full sun, semi-shade

Height : 20 m

Spread : 15 m

Soil

Soil Humidity : Average

Soil Texture : Loamy

pH : Slightly acidic, neutral

Tolerance to Compaction : Low

Tolerance to De-icing Salt : Low

Soil Type : Deep, fertile, moist, well-drained soils

Root System : Deep and wide-spreading

Diseases : No important trouble

Insects : Low sensibility

Leaves :

3 to 5 lobes
Summer : green
Autumn : yellow to red

Flowers :

Season : Spring

Fruits :

Samaras
Season : Autumn

Bark

Picea glauca

(Picea alba)

Épinette blanche

Épicea glauque ; Épinette du Canada

White Spruce

Safe Planting Distance :

6,5 m

Shape : Large tree

Hardiness Zone : 1a

Growth Rate : Medium

Light Requirements : Full sun, semi-shade

Height : 22 m

Spread : 10 m

Soil

Soil Humidity : Average

Soil Texture : Clay and loamy

pH : Acidic

Tolerance to Compaction : Average

Tolerance to De-icing Salt : Low

Soil Type : Fresh, well-drained soils

Root System : Shallow

Diseases : Low sensibility, Canker

Insects : Average sensibility, Spruce budworm

Leaves :

Needles : Straight, stiff, 15-22 mm long
4-sided

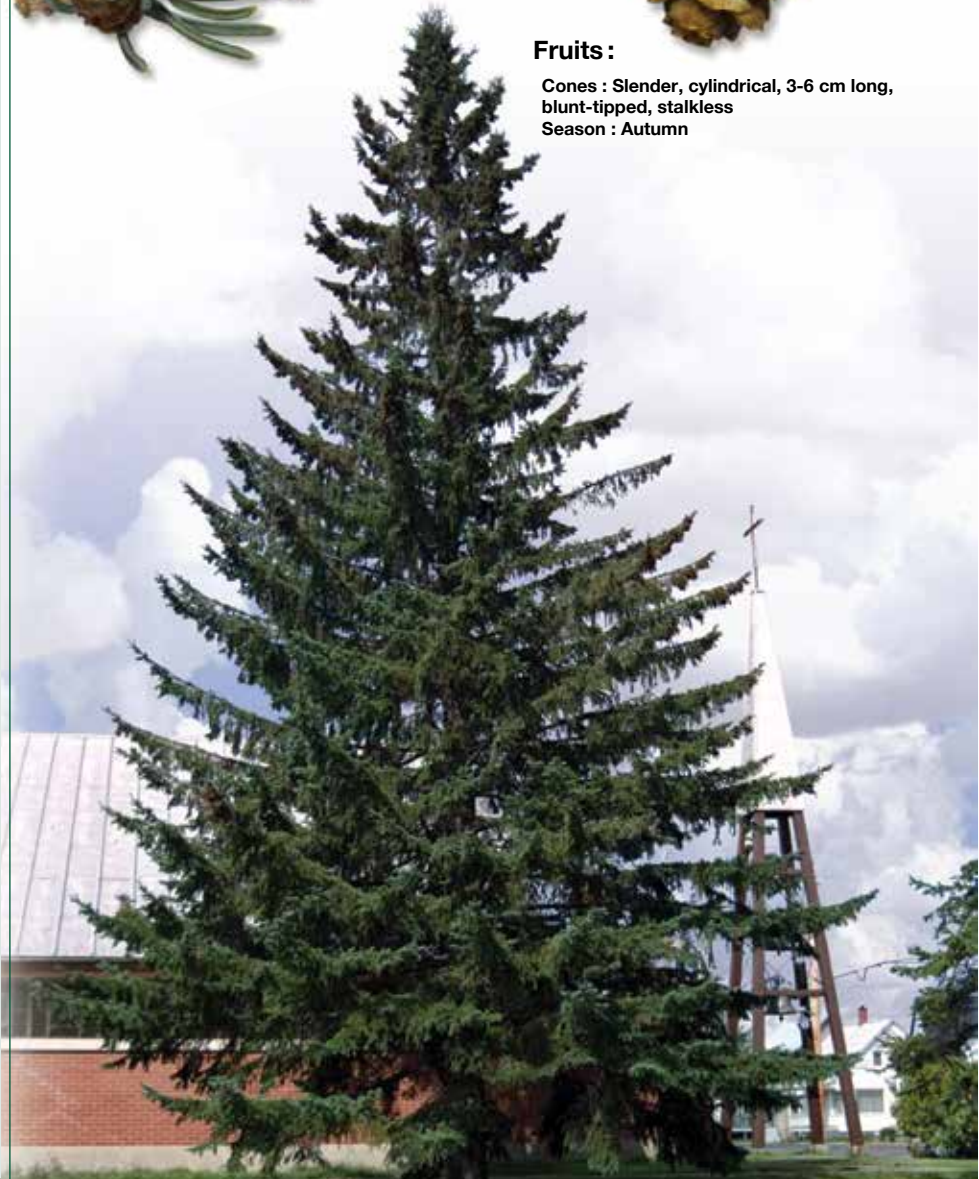

Flowers :

Cones
Color : Greenish, often tinged
with orange or purple

Fruits :

Cones : Slender, cylindrical, 3-6 cm long,
blunt-tipped, stalkless
Season : Autumn

Larix laricina

Mélèze laricin

Mélèze d'Amérique; Épinette rouge

Eastern Larch

Safe Planting Distance :
7 m

Shape : Large tree

Hardiness Zone : 1a

Growth Rate : Medium

Light Requirements : Full sun

Height : 20 m

Spread : 10 m

Soil

Soil Humidity : Average

Soil Texture : Clay, Loamy, Sandy, Humus-rich

pH : Acidic, slightly acidic, neutral, slightly alkaline, alkaline

Tolerance to Compaction : Good

Tolerance to De-icing Salt : Good

Soil Type : Various types, but grows better in moist, well-drained, light soils

Root System : Shallow and wide-spreading

Diseases : No important trouble, rust

Insects : No important trouble

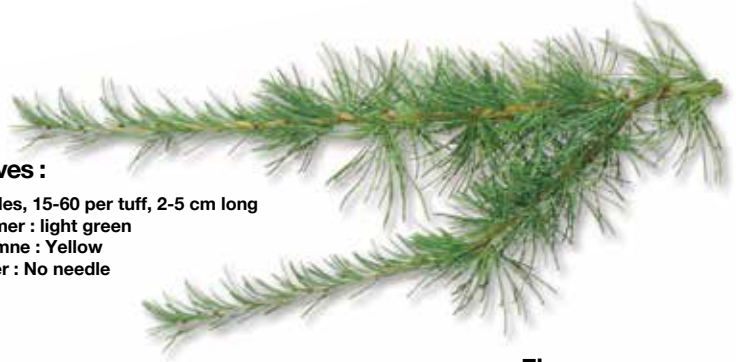

Leaves :

Needles, 15-60 per tuft, 2-5 cm long

Summer : light green

Automne : Yellow

Winter : No needle

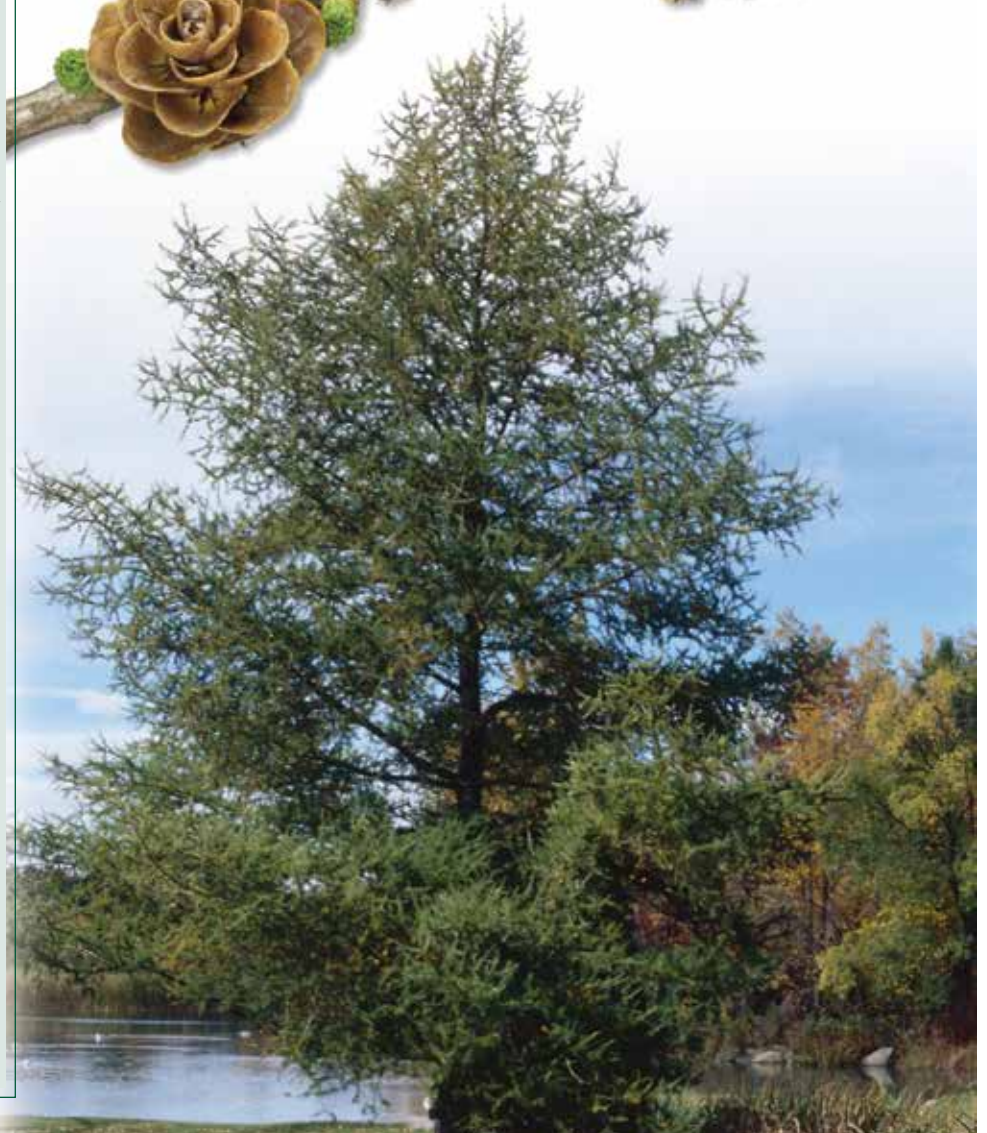

Flowers :

Orange-brown to pinkish

Fruits :

Broadly ovoid, 1-2 cm long, light brown

Season : Autumn

Pin blanc

White Pine

Leaves :

Needles evergreen,
in bundles of 5, 5-15 cm long,
flexible, soft
Remaining on tree for 1-4 years

Bark

Fruits :

Cones : Cylindrical, 8-20 cm long,
yellowish-green to light brown

Safe Planting Distance :
6,5 m

Shape : Large tree

Hardiness Zone : 2a

Growth Rate : Fast

Light Requirements : Full sun, semi-shade

Height : 20 m

Spread : 7 m

Soil

Soil Humidity : Average

Soil Texture : Sandy

pH : Acidic

Tolerance to Compaction : Low

Tolerance to De-icing Salt : No tolerance

Soil Type : Fertile, fresh, moist, well-drained soils

Root System : 3-5 moderately deep lateral roots

Diseases : High sensibility, White pine blister rust

Insects : Low sensibility, Hemlock looper
